Transform your classroom with
a safe and calming sensory space

Introducing The Safespace

Discover the perfect Safespace solution designed to meet the individual needs of your students and accommodate the available space at your school.

Our Safespaces provide a low-stimulation environment where students can unwind, de-stress, and find quiet time when feeling anxious.

These versatile spaces can be easily adapted to suit high or low-sensory needs, making them ideal for play, therapy, and one-to-one activities.

Most importantly, Safespaces offer a safe and comfortable environment, reducing the risk of injury from hard surfaces with flexible sides and a soft padded floor.

Key Benefits of Safespaces

- Meet Individual Needs
- Deliver a Sensory Diet
- Promote Inclusion
- Support Behaviour Self-management
- Reduce Restrictive Interventions
- Therapy and Sensory Space

Tailor-Made For Your School

Each Safespace is designed to meet the needs of your students and the space you have available.

Support and Training

“The main use is for time away to help with self-regulation. This is usually a choice made by the student.

Once in the Safespace the students calm quickly. Students with sensory needs use the Safespace for sensory activities throughout the day. Using the Safespace has helped to improve behaviour across the school, limiting the need for restrictive physical interventions.

It helps the students to be in control of their behaviour as they know they have the choice to go somewhere and let off steam safely without the need for adult intervention.”

Michelle Higgs
Kennel Lane School
Bracknell (UK)

Our expert team will assist you every step of the way, starting with understanding your requirements and designing your unique Safespace, all the way to installation and maintenance.

We offer CPD accredited training as well as access to our ‘resource hub’ which provides a range of information and best practice guidance.

Promoting Inclusion in Your Classroom

Safespaces contribute to an inclusive learning environment by offering a dedicated space where every student, regardless of their unique needs, feels comfortable and supported.
