

Product Customizations

Our Built-4-Me Team is dedicated to creating product customizations beyond what is listed on our product order forms. Experts in the engineering and manufacturing of custom rehab products will listen to your specific requests and build a chair as individual as your fingerprint!

Featured Tilt Family Customizations

- Dynamic Back
- Custom Seat Pan
- Height-Adjustable Stroller Handle
- Custom Vent Tray
- O2 Holder

OUR COMPLETE POSITIONING SOLUTION

We combine 11 years of IRIS Intelligent Rotation in Space Technology...

with the limitless positioning capabilities of The MONO™ Backrest System...

and the comprehensive portfolio of JAY Positioning Supports.

Fully integrated and compatible with the Quickie IRIS, the MONO™ Backrest System and JAY Positioning Supports may be ordered and assembled on-chair at our manufacturing facility. Our Complete Positioning Solution offers the state-of-the-art technology, easy setup, and clinical effectiveness that you've come to expect from Quickie and JAY.

CUSTOM SEATING SOLUTIONS

JAY® SureFit™

- Smart, simple custom seating option mix
- WC-20 transit tested and compliant*
- Bundle with Quickie for compatibility and quick shipping

* WC-20 transit compliant when used in conjunction with a WC-19 compliant mobility base

JAY® ConfigureFit™

- Comprehensive custom seating solution
- WC-20 transit tested and compliant*
- Intuitive order form follows clinical evaluation process to reduce omissions and maximize funding

JAY CUSHIONS

QUICKIE®

Rotation-in-Space Family

The superior standard for innovative, adjustable and quality tilt-in-space technology

Quickie® IRIS™

40° or 55° of Intelligent Rotation In Space Technology

- Seat frame rotates around the user's center of gravity
- Smooth, balanced rotation designed to help user remain comfortable and secure while tilting
- Minimal effort required by caregiver to operate rotation
- NEW rocker arm design minimizes lateral movement and includes cover to prevent debris from collecting on hardware

Compact Base and Fold-Down Back Canes

Portability

- One of the lightest weight tilt-in-space wheelchairs on the market at 39 lbs.
- Compact wheelbase increases maneuverability
- Fold-down back canes allow for easy transport

Adjustments for Optimal Rotation and Stability

- Seat frame adjusts along horizontal plane to align Center-of-Gravity (CG) and Center-of-Rotation (CR) for most intuitive and balanced rotation
- Rocker assembly adjusts on a horizontal plane for front stability
- Rear wheel and anti-tips adjust along the base frame for rear stability
- Frame Set-Up by Quickie optimizes the CG-CR alignment based on a few client measurements

Width-Adjustable Strut Tubes

Options & Capabilities

- Improved Swing-in/Swing-out hangers with intuitive release handles and tapered locking mechanism for a secure fit over time (pictured right)
- NEW Elevating/Articulating Legrest design better aligns pivot with knee joint and is indexed with audible clicks through the range of motion
- Optional width-adjustable strut tubes allow for changes in chair width to accommodate user needs
- Dynamic Back option controls movement of the back to help maintain proper positioning and reduce wheelchair damage resulting from involuntary movements
- Angle Adjustable Stroller Handle, Foot Release Tilt Actuator, and hands-free Attendant Wheel Lock aid caregivers

Quickie Hanger Video

NEW MONO™ Backrest System Option

- Single post backrest system
- Allows backrest width to be selected separately from wheelchair base to accommodate clients with wider or narrower torsos
- Eliminates interference between back canes, backrest hardware, and positioning components for unrestricted placement of lateral thoracic supports
- Improves range of motion for self-propulsion
- Accommodates up to 2" of midline backrest offset
- Features optional dynamic function for controlled movement of the back
- Offers 35° of angle adjustment and folds flat for transport

Midline Backrest Offset

MONO™ Backrest System Video

Quickie® SR45™

45° of Intelligent Rotation in Space Technology

- Utilizes the Quickie IRIS rocker arm for smooth, balanced rotation and effortless operation by the caregiver
- Features the same adjustment and setup capabilities as the IRIS

Smart Option Mix

- Options include the most frequently used armrests, wheels, tires, and seat widths and depths
- New swing-in/swing-out hanger design with simple footrest adjustments and intuitive release levers
- New low profile dual post armrest design

Product Specifications

SPECIFICATIONS	QUICKIE IRIS	QUICKIE SR45
HCPCS Code	E1161	E1161
Overall Weight	39 lbs.	39 lbs.
User Weight Capacity	250 lbs. (Standard) 350 lbs. (Heavy Duty)	265 lbs.
Seat Width	14" - 22"	14" - 20"
Frame Depth	14" - 22"	14" - 22"
Front Seat-to-Floor Height	12.5" - 19.5"	14" - 20.5"
Back Angle Adjustment	-30° to 5°	-30° to 5°
Tilt Range	-5° to 35° -5° to 50° 0° to 40° 0° to 55°	0° to 45°
	+5° to 45° +5° to 60°	
Transit Option	Yes*	Yes

* Conforms with ANSI/RESNA WC-19 standards. Please refer to Quickie® & Zippie® WC-19 Transit Securement Supplement (MK-100072) for additional information. Supplement is available for download at www.sunrisemedical.com
