

Moving forward together

We believe in the power of innovation. We challenge ourselves every day to keep moving forward. To achieve this, we work together with different mobility experts and can rely on a worldwide network of trusted dealers.

Things that matter to us

Accessibility

Innovation

Practical solutions

Quality and expertise

The Micro Joystick has made an immense difference in my life. It provides me what I need: independent mobility and control of my power seating.

- Ryan, 25 years old

How can we help you to get in motion?

together**

mo-vis

moving forward together

mo-vis develops,
produces and
commercializes special
input devices and their
accessories for users
of power wheelchairs
worldwide.

There is no 'typical'
power wheelchair user.
That's why you can
adapt our devices to
individual needs and
requirements. Our
users are always our
priority.

We let you be you

We want to help as many people with motor disabilities as possible, by offering practical, concrete solutions.

Special controls

A full range of proportional drive controls, going from the most sensitive joysticks to devices for people with excessive force.

Low force: **Micro & Multi Joystick**

Standard & high force: **All-round Light & Heavy Duty Joystick**

Input device for attendant: **Scoot Control**

Input control systems

Solutions designed to assist in operating connected devices such as the wheelchair or its input devices and accessories.

Mounting systems

Mechanical and electrical swing away arms or mounting solutions for input devices or accessories.

Wheelchair accessories

Simple but practical accessories for people using power wheelchairs.

Other assistive devices

Other assistive devices intended to improve the daily life of people with disabilities, such as the HID Joystick.
