SPECIAL  
PURPOSE  
STROLLERS

AUSTRALIA

# Introduction to Special Purpose Strollers

Strollers make life as a parent easier – they provide a means to move your child around as you go about everyday activities. When a child has a disability, medical condition, or developmental delay, there may be specific needs or considerations that can be better met through a special purpose stroller, compared to continuing to use a stroller or pram purchased from a department type store.

## Why Might a Special Purpose Stroller Suit My Child?

- Your child's current stroller does not give them enough support to maintain a good sitting position, and you want to be able to access the community with your child.
- Your child fatigues easily, has difficulty walking long distances, or it's more important for your child to conserve their energy for other activities in their day (such as playing with friends or siblings, and going to daycare/school).

**The Pixi and Duro Strollers are designed to manage fatigue in children.**

**The anti-escape buckle can help keep children with developing road safety skills secure.**

- Your child has medical equipment they need to use when in the stroller, and you need to have places on the stroller to attach this to.
- Your child has outgrown stroller options from everyday stores, but still needs support with their mobility in the community.
- Your child is still developing their safety and road awareness skills, so they need a stroller harness that they cannot open themselves to ensure their safety while out in the community.

# Benefits and Features of Special Purpose Strollers:

- Very similar in design to strollers available in retail stores
- Provide additional support for sitting and posture
- Offer both forward and rear-facing seat positions
- In-built growth is available
- Easy to fold
- Seating can be adjusted as required
- Large capacity storage baskets
- Wide variety of accessories available
- Some stroller seats can be removed from the stroller base and attached to an indoor chair base. This means you only need one seat for two different uses

The BINGO Evo Stroller can be altered to face the view or you!

The BINGO Evo Stroller is growth-adjustable.

Robbie uses his BINGO Evo Stroller with his seat adjusted in tilt for more comfort.

The BINGO Evo Stroller has a COBRA Indoor Base, creating a new purpose for the same seat unit.

# How to Choose a Special Purpose Stroller

- **What do you need the stroller for?** The first question to consider is how you'll be using the special purpose stroller. Will it be for flat indoor surfaces or rougher terrain like gravel? Do you plan to walk with your child or also go for runs? Wheel size and direction can be adjusted depending on your needs.
- **Size and weight:** Choose a stroller that fits your child's current size but also allows for growth. Make sure your child stays within the weight limit set by the manufacturer.
- **Support and positioning options:** Some special purpose strollers offer additional postural support through accessories like head, neck, trunk, and foot supports, but not all models provide the same level of support. Some strollers focus on fatigue management or safety, while others are for children needing greater postural support. For example, a child using a stroller for behaviour management may walk independently and require less support than one fully reliant on a stroller for mobility.

**The Duro and Pixi Strollers are tailored to help children with fatigue management and community mobility safety needs.**

- **Accessory attachments:** Consider whether your child has any medical equipment they will need to take with them. Only some special purpose strollers offer additional storage and attachment points for medical equipment, such as oxygen bottles, suction machines, and feeding pumps.

**The BINGO Evo Stroller offers additional storage and attachment points, such as an oxygen bottle holder (left) and IV pole attachment (right).**

- **Transport and lifting:** Make sure you check that you can fold, lift and transport the special purpose stroller as some pack down more compactly than others.

# How to Get the Most Out of Your Trial Appointment

You should always trial the stroller with your child's occupational therapist or physiotherapist present – this is a great opportunity to explore whether the special purpose stroller meets your child's needs and lifestyle requirements.

Some key things to look out for and test in a trial include:

- **How does the stroller fit my child currently?** What is my child's current weight and what is the maximum weight capacity for the stroller?
- **What parts of the special purpose stroller grow?** Some strollers have in-built growth through the seat width, seat depth and backrest height. Some also have conversion kits that allow you to upgrade to the next size stroller of that product by changing a few parts, rather than ordering a whole new stroller. Growth and conversion kits can enable your child to keep using the special purpose stroller for longer.
- **How is my child sitting in the stroller?** Do they need additional support around their hips, trunk, head or feet to maintain a good sitting position?
- **What harness options are there on the special purpose stroller?** What alternative buckle styles are there on this model of stroller to help support my child with behaviours of concern when in the community?
- **Is the stroller easy to transport?** How easy is the stroller to push? How does the stroller fold? Am I able to lift the stroller in and out of my car? How do I remove the seat unit from the stroller base and put it back on?
- **Are family or carers available to attend a trial?** Where possible, having others who support the child try the stroller and share their perspectives can be helpful before deciding on its suitability. Gathering multiple viewpoints can provide the occupational therapist or physiotherapist with valuable information to aid in a funding application.

# BINGO Evo Mini Stroller

Australia's smallest adaptive stroller with a range of accessories and options to meet the needs of different children.

## Specialised Early Intervention Stroller

### Adjustable seat unit

Seat depth and width, back support height and lower leg length

### Individual upholstery

Removable seat, back, head and laterals cushions allow easy customisation

Multi-directional suspension **protects the child** by absorbing ground bumps, and is effective off road or on rough terrain

**Ergonomic,** height-adjustable push handle

**Sun canopy** option available to allow parents and caregivers to still get out and about, knowing the child is protected from the sun

**Stepless** seat depth adjustment

### BINGO Evo Mini Stroller Package Includes:

- Removable seat
- Tie-downs
- Matte black mobility base
- Hip guides
- Swivel front black mag wheels
- Basket
- Solid tyres
- Adjustable suspension
- Receiver for foot support

### Colour Options:

Turquoise Soft (-349)

Berry Soft (-347)

Black (-346)

### ONE SEAT. TWO BASE OPTIONS

Indoor COBRA base option available. Height adjustable with the child seated.

### SIZE UPGRADE AVAILABLE

Easily upgrade stroller frame to Size 1 BINGO Evo or BINGO Spex, increasing stroller lifespan.

### TILT

The special construction of the tilt mechanism allows a 45° tilt of the seat unit without compromising the overall stability.

### COMPACT FOLDED SIZE

Easier to store in a car boot! The innovative folding mechanism can be released easily on the push bar.

### BACK SUPPORT RECLINE

The operating elements of the tilt and back support recline are positioned centrally and allow for easy and secure handling.

# BINGO Spex Stroller

## A breakthrough in rehabilitative stroller seating.

The BINGO Spex provides a solution for paediatrics that has never been seen before. For children with positioning needs where a stroller is the preferred option for the family, the BINGO Spex provides optimum seating support designed to accommodate even the most challenging postures.

## Create clinical solutions with a Spex cushion and back support system.

### ALLOWANCE FOR HIP/THIGH FLEXION AND PRE-ISCHIAL SUPPORT

A good pelvic foundation is paramount to assist in slowing, or even preventing pelvic and spinal asymmetries. Therefore, the cushion adjusts to correct or accommodate the child's pelvic and thigh needs.

### SPEX POSITIONING CUSHION BASE

Strategic positioning pads can be added or removed from underneath the cushion to allow for different contours and shapes. This way we can meet the client's posture requirements present today and readjust them in the future.

### PELVIC OBLIQUITY BUILD-UP

Pelvic obliquity build-up can be achieved and easily adjusted under the cushion ischial well. Its adjustable pre-ischial area can be adjusted on the spot for greater or lesser anti-thrust needs.

### CREATE INSTANT SHAPE

Back support shaping allows for accommodation or correction of spinal asymmetries, in addition to multi-adjustable lateral trunk supports and anterior chest supports.

### SPEX CONTOURING SYSTEM

A modular and adjustable solution which can be tailored to meet the individual support needs of each child.

### SUPPORT WHERE IT'S NEEDED

Axial lateral support technology offers unparalleled adjustment to provide trunk support exactly where it's needed, promoting comfort and function.

A smart-looking stroller that enables parents to take their child outside and explore!

Forward to rear-facing seat configuration in 30 seconds!

Adjustable recline, seat tilt and elevating foot support.

**LATERAL HEAD SUPPORT**

Ultimate comfort and positioning for the head with inbuilt lateral and occipital support. Two styles available: Standard Lateral and Extended Lateral (shown).

**Standard** 2885-4241-XXX  
**Extended** 2885-4341-XXX

**Superior comfort and style**

With a wide range of coloured seating options to choose from, the BINGO Spex offers a colour to suit any style. Stand out from the crowd with Chilli Red, look pretty in pink with Calypso Pink, or pick another colour from the rainbow.

(Express delivery on colours stocked in our Devonport Warehouse).

# Adjustable Seating and Stroller

COBRA height-adjustable indoor base. The seat easily transfers into the COBRA for feeding and other activities. Tilt setting can still be adjusted.  
**Size 1:** 2880-8711-000  
**Size 2:** 2880-8721-000

Seat in forward-facing direction.

Seat in rear-facing direction.

## Unparalleled postural support with innovative Spex seating

### AXIAL PELVIC SUPPORTS

Multi-adjustable pelvic supports can be adjusted in width, angle and depth for optimum pelvic control. These pads are mounted to the quick-release hardware meaning transfers are easy.

**Size 1** 2885-1111-000  
**Size 2** 2885-1112-000

### SPEX BACK SUPPORT

Comfortable pressure-reducing back support with contouring cell system to permit a personal contour for bony prominences, scoliosis and other asymmetrical trunk postures.

**Size 1** 2885-2012-0XX  
**Size 2** 2885-2014-0XX

### SPEX SUPERHIGH CUSHION

Specially designed for a young child who has moderate to high positioning requirements. Spex SuperHigh offers optimal medial and lateral thigh contours to effectively position the pelvis and legs. Spex positioning technology allows further adjustment for pelvic obliquity, hip flexion and other clinical requirements.

**1.1** 2885-0610-0XX    **1.2** 2885-0611-0XX  
**2.1** 2885-0612-0XX    **2.2** 2885-0613-0XX

### AXIAL LATERAL TRUNK SUPPORTS

Comfortable lateral trunk supports that are width, depth and multiple angle adjustable. Patented mechanically rotational system allows the lateral pad to rotate to correctly align to the user's trunk. Swing-away hardware makes it easy for carers to transfer the child in and out.

**Narrow** 2885-3410-291  
**Broad** 2885-3431-291

### FOREARM SUPPORTS

Comfortable, padded forearm supports on quick-release hardware make transfers easy for carers.

**Size 1** 2885-5621-291  
**Size 2** 2885-5622-291

### FEET POSITIONING SANDALS

Foot supports provide additional stability for lower limbs and feet, adjustable independently to achieve the optimum foot position.

**Sandals** 2885-6081-000  
**Sandal Raising Blocks** 2885-6091-000

# Pixi Stroller

An attractive, lightweight stroller with rigid seating shell construction.

## Outstanding stability & quick, easy folding

**Easy kerb navigation**  
Handle bar which extends over rear axle

**Back support recline**  
allows the child to sleep or relax

**Easy rear wheel brake system**

**Robust, sturdy design**  
for excellent reliability

**Manoeuvrable -**  
Great stroller to push, with ball bearing castors to easily navigate shopping malls and more

**Pixi Stroller Package Includes:**

- Foldable Frame
- Grey Upholstery (wipe-clean seat surfaces)
- Flip-up Foot Plate
- 5 Point Harness

**Configure for behaviours of concern**

- Anti-escape hip belt 1405-6211-026
- Pen-release hip belt 1405-6211-025
- Anti-escape tee-pad anterior chest support configuration 2560-6556-026

Parents feel great with this smart design.

Quickly folds down to a compact size to place in a vehicle boot. Easy 'lift-to-fold' catches.

# Multiroller Stroller

Made from quality German-manufactured parts, the Multiroller is a lightweight, high-work-capacity stroller ideal for users with low-level postural support needs who require mobilisation assistance over long distances.

Incredibly light, incredibly tough!

### Build to Last!

Despite its light weight the Multiroller is ultra-durable, with a high work capacity and the ability to hold up to 75kg – perfect for growing users and older occupants.

### Lightweight and Compact

At just 9kg, this sleek and stylish stroller is particularly light, with an easy-fold function making it simple to transport.

### Easy Access

The high seat-to-floor ratio of the Multiroller makes transfers a breeze.

### Interchangeable Front End

Stylish, stable and easy to maneuver, the Multiroller includes an innovative feature which allows the front-end to be changed out for an alternative wheel set – simply swap in the optional jogger wheel set and you've instantly got an off-road solution ready for any terrain!

The high seat-to-floor ratio makes transfers much easier than conventional recreational strollers, while the sling upholstery is both breathable and comfortable. A canopy and drum brakes come as standard.
